Alex Yan

Senior Software Engineer, Full-Stack
alexalexyan@gmail.com
Las Vegas, NV

SUMMARY

Senior Software Engineer with 9+ years delivering full-stack web and mobile applications. Experienced in React, React Native, Node.js, and AWS services, building HIPAA-compliant portals, high-scale features, and automated end-to-end testing pipelines.

EXPERIENCE

Senior Software Engineer
FoodSmart
Aug 2024 - Dec 2025

- Built a HIPAA-compliant patient portal web application handling healthcare data with React, Next.js, and Node.js.
- Designed and implemented a provider scheduling system that streamlined appointment coordination and boosted operational efficiency.
- Released the first production version of a React Native mobile app, creating a base for subsequent feature expansion.
- Incorporated AI LLM tooling, to speed development cycles while preserving code quality, testing standards, and architectural soundness.
- Automated e2e test suites to guarantee stability of complex user workflows.

Senior Software Engineer
Academia.edu
Aug 2022 - Aug 2023

- Created a Ruby on Rails web application featuring a React front-end.
- Engineered high-scale features serving millions of daily active users.
- Designed and tuned performant background jobs and database queries on Postgres.
- Refactored the React front-end to cut load times and enhance developer experience.
- Implemented features leveraging AWS DynamoDB (nosql), ECS, OpenSearch, and Redshift.

Tech Lead
Wonderschool
Jul 2019 - Aug 2022

- Built full-stack features with Elixir, Firebase, GraphQL, and TypeScript.
- Scaled a React Native/Expo app from beta to 50 % user adoption.
- Moved the platform to a distributed architecture to support integration of acquired services.
- Collaborated with product teams to scope and define feature requirements.
- Led planning and estimation sessions, breaking down complex features.
- Established mobile development standards that reduced technical debt, prevented regressions, and ensured accessibility.
- Formalized hiring processes, doubling the engineering team size.
- Mentored junior engineers and contractors in TypeScript and mobile development best practices.

Software Engineer
Mystro
Apr 2019 - May 2019

- Implemented features for a rideshare React Native app serving thousands of users.

Mobile Developer
CloudCompli
May 2018 - Apr 2019

- Led end-to-end development of a React Native app through its full release, establishing CI/CD pipelines for reliable deployments.

Software Engineer
Iconic
Oct 2016 - May 2018

- Deployed full-stack Node and React support systems for customer applications.

Software Engineer
Appfolio
Aug 2015 - Oct 2016

- Migrated the frontend to React, improving performance, interactivity, and development velocity.

Software Development Engineer Intern
Microsoft
Jun 2014 - Aug 2014

- Developed a video mail feature for Lync, a precursor to Microsoft Teams.

PROJECTS

NyanBun
Japanese language learning app built with React Native that adapts to learner proficiency. Integrated OpenRouter for AI-driven grammar analysis and used Kuromoji tokenization with local JMDict SQLite storage. Adaptive controls and AI-generated metadata improve content relevance.
react native, open router, kuromoji, sqlite, jmdict

- Built a Japanese language learning app with adaptive controls using React Native
- Integrated OpenRouter for grammar analysis and targeted study material generation
- Implemented tokenization with Kuromoji and served definitions from local JMDict SQLite database
- Cached and regenerated grammar definitions based on user feedback ratings
- Used AI analysis to measure article difficulty, category, and metadata tags

EDUCATION

BS · Computer Science
UC Santa Barbara
Jun 2016

SKILLS

react, react native, dynamodb, aws, cypress, playwright, jest, react testing library, nodejs, typescript, next.js, redux, graphql, html5, css3, elixir, firebase, ruby on rails, elasticsearch, gcp, ecs, javascript (es6+), electron, native android, phaser.js, pixi.js
